

Amendments to the Drawings

Please amend FIG. 1 of the drawings by adding reference numerals 27, 28, and 29 as clearly shown on the first replacement sheet of Appendix A. The additions of these three reference numerals accords the specification at page 3, lines 23 and 24.

Please add new FIG. 4b to the drawings as shown on the second replacement sheet of Appendix A. New FIG. 4b has been added because it would have been difficult to indicate space 200 by adding a reference number to FIG. 4 as filed, because in FIG. 4 as filed, the space is filled with filler 210; therefore, a new reference numeral in FIG. 4 would have indicated essentially the same element as filler 210. Therefore, the addition of new FIG. 4b was deemed necessary to clearly illustrate the space between the camera and the receptacle. It is respectfully submitted that no new matter has been added to the application by the addition of FIG. 4b.
